

Georgetown Worship Group State of Meeting Report  
Georgetown, TX Friends Meeting  
March 2021

### WORSHIP

Our meeting is not dormant due to the pandemic. As long as we are Quakers together, this state of being dormant will not be true. We may not be "in person" with each other right now, but we are together in spirit and belief. The spirit illuminates each of us whether we are together in person or not for worship. We have done some Zoom meetings and Zoom coffees but most of us are about Zoomed out by now. We have no availability of a place to worship together until restrictions are lifted. We have, however, continued to contribute out rent money to the Methodist Church that hosts our meetings.

### MEETING COMMUNITY

We do care for and help each other in all ways possible during this physical separation. Keeping in touch online is our best way of being a vital spiritual community. When someone is ill, we make sure to offer spiritual and tangible help.

### RELIGIOUS EDUCATION

Many in our meeting enjoy Quaker reading both online and books. We share inspiration and sources.

### TESTIMONIES

Quakers by definition stand against prejudice and injustice. This year was difficult for all of us as the entire country does not espouse our policy of tolerance and inclusion. We can make change best living the example of our beliefs and this is what we need to strive toward.

### DECISION MAKING

We have had Zoom Meeting for Business to address needs in the community and to give monetary support to organizations and groups around us who are working toward relief. We continue to support Food for Friends with contributions since our in person involvement is not possible at this time.

### INTERVISITATION AND OUTREACH

Keeping up with SCYM online has been our connection and inspiration this year. We appreciate their work and guidance. Outreach has been through monetary support in the community.

## MEMBERSHIP CHANGES

The membership of our meeting has not changed. We are here and look forward to seeing each other and welcoming new attendees.

## CONCERNS

At this time our concerns evolve around re-opening. When? What will it be like?
